

Explore the design

A design and builder for the West Gate Tunnel Project has now been selected. The design will soon be assessed through an Environment Effect Statement (EES).

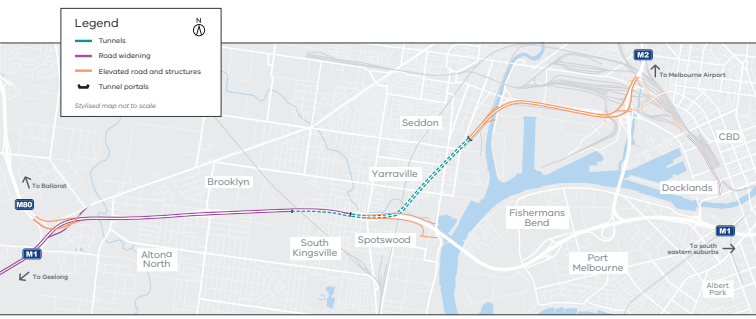

You can explore the design in detail and talk with the project team at one of our walk-through experiences at Yarraville, Spotswood and Docklands.

We're also hosting information sessions between North Melbourne and Geelong to provide an update on the design, the planning process and to answer your questions. See locations and dates overleaf to find a session near you.

The project

The West Gate Tunnel Project will deliver a vital alternative to the West Gate Bridge by providing a much needed second river crossing . This will mean quicker and safer journeys, while removing thousands of trucks from residential streets.

It will widen the West Gate Freeway from 8 to 12 lanes, build a new road tunnel and bridge, and provide direct access to the port, CityLink and the north of the city.
